I. Introduction

EMIS offers critical information from various emerging markets across the globe. This user-guide is designed to help you navigate in a clear, step-by-step manner through the services. In particular, the guide is intended to help you:

- Identify and access required data in simple and few steps
- Save your time while surfing to maximize efficiency
- Refine and narrow search options to get desired results in minimum steps
- Perform key functions such as download information into desktop applications, save, copy etc.
- Install and use foreign language characters and fonts
- Use of .MyISI. a powerful way to create an ISI Emerging Markets Portfolio. Think of it as your personal clipping service

This guide also answers some FAQs and provides a list of worldwide subscriber support contacts. Please note that Internet Securities Inc. continually enhances the ISI Emerging Market Service by offering new time-saving and innovative features and adding new and hard-to-find content regularly. If you notice that a particular product or feature is not reviewed here or need immediate assistance, please contact your local customer service representative: www.securities.com/contact.html
II. Getting Started

The ISI Home Page (http://www.securities.com)
System Requirements

Internet Securities Inc. supports the following browsers, you will need to upgrade older browsers to fully experience all our features and tools. Additionally, your browser must be Java & JavaScript enabled.

- Firefox 2
- IE5
- IE6

Browser Details: [http://www.securities.com/browser_requirements](http://www.securities.com/browser_requirements)
- JavaScript Support: Passed
- Cookie Support: Passed
**Home page URL**

For our regular subscribers, the URL to access the ISI Emerging Markets service is: http://www.securities.com/

Our site license users are automatically authenticated (using IP addresses) on this custom site: http://site.securities.com/
Your User name and Password

When prompted for a username & password (case sensitive) do the following:

- Enter user name in appropriate box. Use mouse or press TAB key to select password box.
- Enter your password and then press enter or click on the Sign In button.
Book marking our homepage

You can save the URLs (addresses) for accessing ISI Emerging Markets - EMIS pages by adding them as favorite in IE or by bookmarking them in Mozilla Firefox. This will help you to open ISI Emerging Markets - EMIS page from the drop-down menu without actually having to remember the URL.

For Internet Explorer:

To mark a page as favorite:

- Access the desired EMIS page.
- From the Favorites menu, select Add to Favorites. The Add Favorite dialog will appear.
- In the Name box, type ISI Emerging Markets - EMIS.
- Click OK. The ISI Emerging Markets page will be added in the Favorites folder.

To access the marked page again:

- Open IE browser.
- From the Favorites menu, select ISI Emerging Markets - EMIS.

In Mozilla Firefox:

To bookmark a page:

- Access the desired EMIS page.
- From the Bookmarks menu, select Bookmark This Page. The Add Bookmark dialog will appear.
- In the Name box, type ISI Emerging Markets - EMIS.
- Click OK. The ISI Emerging Markets page will be added in the Bookmarks folder.

To access the marked page again:

- Open Firefox browser.
- From the Bookmarks menu, select ISI Emerging Markets - EMIS.
Make ISI Emerging Markets your home page

In Internet Explorer:

- Select Tools on windows menu and click on .Internet Options.

In Mozilla Firefox:

- Open Firefox browser.
- From the Tools menu, click Options. The Options dialog will appear.
- In the Startup section, In the Home Page box, enter http://www.securities.com/
- From the When Firefox starts drop-down, select Show my home page.
- Click OK. The ISI Home page will appear as soon as you open a new browser window.
III. Accessing ISI Emerging Markets

The Navigation and Message area

- Once you are on a country home page (Home) and you want to switch to another country product (you may need an additional subscription) simply select the country from the drop-down menu.

- Important product related messages are displayed in the area above the navigation bar.

The ISI Emerging Markets service offers eight primary categories for all country products. These categories are consistent and also comprise the primary navigation bar and will appear on every page. To access information from any of these categories, simply click on the appropriate tab.
New EMIS User Guide

Frontpage - Parekh, Karnik and Achuthan placed on Satyam board

Publication: Financial Express
Publisher: The Indian Express Online Media Ltd

January 12, 2009

Taking rapid action to stem the Satyam and send a message to investors and observers across the globe, the central government announced the appointment of three eminent personalities on the board of Satyam Computer Services Limited. They are, Deepak Parekh, chairman, HDFC Bank; V. Srinivasan, former president of NPCC; and C. Achuthan, former SBI chairman—all three have the right credentials to address the issue on hand. Industry and market participants have applauded the decision to put a top banker, an IT expert and a market investigator on the company's board.

The newly appointed board will meet within 24 hours (before Monday noon) to take stock of the situation. According to President, B. N. Sircar, former chairman of company affairs, the board's immediate task is not to look for a strategic buyer but restore the company's credibility, customer confidence and employee morale, besides safeguarding the interest of Satyam's employees, investors and other stakeholders.

Achuthan said the team's top priority would be to put the scam-tainted IT company back on the road and ensure that the guilty are not spared. "The first step in the board meeting would be to evolve a strategy on how to go ahead and restore the damaged image of the company." While contacted, Deepak Parekh said it was too early to comment on the situation.

Meanwhile, Ganesha Natarajan, chairman, Navcar, was emphatic in his response. He said, "I think the combination of these three people is the best in terms of defining corporate governance and organizing government finance and equity. The next set of members should be those with experience of managing large multinationals especially in operations and those that can attract finance."

"The board members bring a lot of confidence to the market and this will be seen as a positive. Though the valuation for Satyam is still under a cloud," said Chennakeshappa, head of research at ICICI Securities. The equity market has seen the Satyam stock undergo a huge plunge, and its price drop on the markets by 9% since the scam broke out. Sudip Bandopadhyay, CEO and managing director of HCL Technologies, reckons that it will give investors a lot of hope. "The speed with which the government has reacted is a strong positive."

Prabhat Halder of Prime Database thinks that the appointment of people who can make a difference to the situation is a welcome move. "There could have been political appointments as well, but this is political and pragmatic," he added.

Even the peers in the technology business were positive. Wipro executive director and chief financial officer Suresh Senapaty told ET, "We believe this will help restore confidence of all stakeholders and the international community." Similar statements were issued by Infosys team members.

However, analysts point out that now with the Ceilc falling the share in the Satyam affair, state institutions that have investment and exposures in Satyam would not take any independent decisions on the issue, without consulting the government. To that extent, the institutions are relieved. Thomas Mathew, managing director, Life Insurance Corporation said, "The situation has changed positively after the government intervention and the formation of a new board with prominent professionals. With this kind of people at the helm, we are now confident that company would be put in the right course very soon." He refused to comment on the rumors that institutions were gathering together to get a better position on the board.

Mathew also denied that the corporation, with over 4% stake, will demand a board-level representation or is talking to other institutional players who have stake in LIC. According to him, the corporation is not in a hurry to exit the Satyam portfolio as it is a long-term investment.

All eyes are now trained on the board to follow the course of action. Lazard Brothers has been known to have expressed an intention to be on the board and is rallying support.

* End of Table

---

![Image of EMIS User Guide](image)
The Company Screening Tool is a powerful query tool, that allows you to create league tables for companies and industries, from our financial database.

You can easily create tables, based on 9 financial criteria such as Assets, Liabilities, Revenue, Profit or 14 financial criteria such as Return On Equity, Debt to equity, Current Ratio, etc

- You can display the last 2 or 3 years results for up to 5 indicators
- You can also select the region/country/industry for the particular search
- The company search allows easy access to the financial statements and quotes pages of the company, through links displayed on the result's page
- The results also displays the company's ranking in its industry
- You can display the results in 3 different currencies. Local currency, US dollar and Euro
- You can search for a company, by specifying the total revenue within the range fields (for example: you can specify the total revenue to be larger than 1 million USD)

The Screening Results pop-up window, displays the searched company's Name, Country and the industry it belongs to, along with its ranking.
For quick access to your favorite company profiles, click on MyCompanies link, and access them later at MyCompanies tab, on the company page.
"Financial Statements" provides access to complete financial statements of a company, including quantitative analysis, displaying financial details such as revenue, expenses, assets, liabilities and all the other financial aspects of a company.

• Financial Comparison enables you to keep track of trends, compare a company with its competitors and gain insight on a company's present and past performance.

• Complete financials are available under the link of Financial Data.

• Financial highlights comprise up to 45 key financial fields such as: Total Assets, Shareholder Equity, Cash & Equivalents, Current Assets, Current Liabilities, Total Revenues, Operating Profit (Loss), Net Profit (Loss) etc & up to 37 ratio fields like EV/EBITA, ROA, EBITDA, EBIT, Enterprise Value, ROE, Operating Profit Margin etc

• Financial Accounts are categorized into Balance Sheet, Income Statement, Cash-flow, Sources/Uses of funds, Ratios etc.

The Financial Data tab also provides the facility to compare the financial statements of the company against its competitors, regardless of the financial standard, country or currency.
New EMIS User Guide
The Industry Page

**A Industry Profiles:** provides you with detailed economic and financial characteristics as well as trends for the selected industry.

H Archived and Beta Publications: Click here to access issues that have been discontinued or are in Beta/testing phase.

- You can now track Publications from this category by adding them to MyPublications.
- Select and add publications in the “MyPublications” folder to view them on your custom MyISI page.
MyISI is a powerful way to create your ISI Emerging Markets Portfolio. You will be able to:

- Add various documents, articles, publications, companies, searches, and industries of your interest to MyISI Emerging Market Services portfolio.
- View all information added to My ISI on MyISI page.
- Remove contents from MyISI.
- Customize the lay out of your categories and view your page according to your preference, using the new drag-and-drop feature.

**MyContent:** Define and place publications, searches, documents, companies and industries at one customized profile page. Customize the look and placement of the content by ‘dragging and dropping’ boxes.

If you have set up multiple profiles, you can move content from one profile to another, using the new ‘drag and drop’ feature.

**MyNewsstand:** Select publications of your preference to appear on your Country homepage, at MyNewstand. Just select your desired sources and assign a priority using the drop down boxes, and they will appear in the order you specify on the respective Country Home Page. *

**MyPublications Alerts:** Select the publications you wish to view at MyNewstand, on your Country homepage. Just select your desired sources and assign a priority using the drop down boxes, and they will appear in the order you specify on the respective Country Home Page. *

**Remove:** You can also remove sources from your list and select your viewing options.

**MyFinancialAlerts:** Set up an alert to advise you when a new financial statement is available on EMIS, using the MyFinancialAlerts feature. You can create an alert for any company straight from a company’s Profile page, and manage your alerts in the MyFinancialAlerts section.

**MyClippings:** Store articles or documents in a ‘Clippings folders, and send ‘clippings’ to your colleagues. You can add any article to your clipping folder, by clicking on the appropriate link, on any news item. *

**MyProjects:** Manage access to the ISI service using project codes. Use this page to allocate expenses and assign data use to particular projects.

**MyAccount:** Allows you to select a default start page when you log in into the EMIS service. You can also, select the language for the interface, or set the default language for content. For example, if only speak and read English, you can specify that the service displays only English language material.

**Advanced Search:** Search for a specific term/article in your publications.

* Please feel free to contact your customer service representative if you need more information or support.
IV. Advanced Search
Selecting countries

Advanced Search allows you to search through all ISI Emerging Markets' country products to. The countries you have access to depends on the country products to which you currently subscribe. If you wish to receive access to additional products, please email mailto:info@securities.com or call your local ISI Emerging Markets representative. To select multiple countries hold down the Ctrl-key and select the relevant countries with your mouse button. If you do not select a country, Advanced search will automatically search the default, current country product.

Searching in foreign languages

Advanced Search allows you to search in English and local languages. To select multiple languages, hold down the Ctrl-key and select the languages with your mouse button. Should you select languages with conflicting character sets, Advanced Search will ask you to confirm or change your current character set.

Note: Advanced Search configures each local language with its corresponding character set. If you select multiple languages that have conflicting character sets, you will be asked to verify the character set you are using. Each character set corresponds to a language:

- Latin_1 (English, Spanish, Portuguese, French, German)
- Latin_9 (Turkish)
- cp1250 (Polish, Czech, Hungarian, Romanian, Slovakian, Estonian, Latvian)
- cp1251 (Russian, Ukrainian, Bulgarian)
- Chinese (Chinese)

Advanced Search automatically defaults to English, if you do not select a language.

Note: If you subscribe China country product, you would be able to search in Chinese. Click on the link: "Search in Chinese"

Entering search terms in foreign languages

You can enter search terms in foreign languages by:

- Using your keyboard (Your technical department can help you set this up)
- Cutting and pasting text from your browser
- For Latin character sets, you can use the common smashed version of the term(s)
Setting up your browser to display foreign languages

**Microsoft Internet Explorer (4.0 and higher)**
- Go to the View menu for Explorer
- Select Encoding
- Select the appropriate encoding for the language you are using

**Searching by publication dates**

Advanced Search gives you the flexibility to search by publication date. Simply select from one of the following options:
- Today: searches for articles published today.
- Last 7 days: searches for articles published during the last 7 days.
- Last 30 days: searches for articles published during the last 30 days.
- Last year: searches for articles published during the last year.
- Date range: searched through a specific date range in yyyy/mm/dd format.

**Searching by Date Range**

To search for articles published between February 01, 2001 and May 30, 2001 enter preferred dates into the below shown date range box:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Range from</td>
<td>to</td>
</tr>
</tbody>
</table>

(yyyy/mm/dd)

**Understanding the default settings**

Advanced Search will automatically default to the following settings if you leave them blank or don't change them:
- **Country/Region:** The country product you are currently using
- **Language:** Presents the option to select any specific language
- **Content types:** All
- **Publication Date:** Last year
- **Search Term:** AND search
Search Results

After you submit your search, Advanced Search conveniently lists the results of your query in the following format:

In Advance Search, there is a new feature "Display Results" which provides you with two options:

**Normal:** It will retrieve all the results on one page but selected articles on a different window.

**Scanner:** Select this option to include all the results and articles of interest on the same page. This will allow you to scan information without the need to open each article on a new window. (Please note that, this is applicable only for HTML articles, however other types of files for example: EXCEL, PDF, etc. opens in a new window).

Normal:
Search for: Fill in the query or the keyword you wish to look up

Normal: It will retrieve all the results on one page but selected articles on a different window.

Search: Click on Search to retrieve the results for the query.
Scanner:

A Search for: Fill in the query or the keyword you wish to look up

B Scanner: Select this option to include all the results and articles of interest on the same page. This will allow you to scan information without the need to open each article on a new window. (Please note that, this is applicable only for HTML articles, however other types of files for example: EXCEL, PDF, etc. opens in a new window).

C Search: Click on Search to retrieve results for the query.
**New EMIS User Guide**

![New EMIS User Guide](image)

**Documents:** Now access articles which you are searching for on the same page, by clicking on the article links at the search page result.

**Company Profiles:** This section offers the search query related company profiles.

**DealWatch Deals:** Get comprehensive merger and acquisition deals information with respect to your search query in this section.

**CEIC Macro Statistics:** Get various macro statistics related to searched query, by clicking on this tab to access charts and data.

**CEIC Industry Statistics:** Now access Industry statistics related to the searched query, along with a mouse over facility to view charts and various indicators under this section.

46
Retrieving PDF articles

Advanced Search allows you to retrieve PDF documents. If your query results are in PDF format, you will see this icon in the results column.

Viewing PDF articles

Any article with the PDF icon next to it, can be viewed using Adobe Acrobat Reader. Since Acrobat Reader is a plug-in, you will not be able to select multiple PDF articles at the same time. You will have to view them one by one. If you cannot view PDF documents, you will need to install Adobe Acrobat Reader:

Case Insensitive Search

With Advanced Search you will be able to enter terms in either case (lower or upper) and get the same results.

Multiple phrases and wildcards

To locate exact or context-specific phrases, use quotation marks (single or double), brackets, or parentheses around words or phrases that must appear together. For example: To find articles about energy and crude oil, type the words energy and crude oil in the search box.

However, if you do not use quotation marks, the search engine will not recognize the separate phrases.

Wildcards may also be used to broaden your search. By typing an asterisk (*) after a root word, Advanced Search will search for all words containing that root word. For example: Type tele* to find articles containing any words with the root or wildcard tele, such as "telecommunications", "telecom", Telebras", "telephones" or "television".
**Refining your search (Logical Operators: AND, OR, NOT, NEAR)**

At its simplest, a search query may have one word, but you also have the option to refine your search by using the following operators:

<table>
<thead>
<tr>
<th>Operator</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>and</strong></td>
<td>Searching for <strong>BPO and Growth and Employment</strong> will retrieve articles containing all 3 words.&lt;br&gt; The search engine also works the same way for keywords not joined by any operator, i.e.:&lt;br&gt; <strong>BPO and Growth and Employment</strong> will return the same results as <strong>BPO Growth Employment</strong>.&lt;br&gt; Note that searching is <strong>not</strong> case sensitive, so this is same as searching for <strong>bpo growth employment</strong>.</td>
</tr>
<tr>
<td><strong>Or</strong></td>
<td>e-governance or egovernance&lt;br&gt; This search will retrieve articles that contain either the word e-governance or egovernance or both.</td>
</tr>
<tr>
<td><strong>Not</strong></td>
<td>Internet not banking&lt;br&gt; This search will retrieve articles that contain the word Internet, but not banking.</td>
</tr>
<tr>
<td>*****</td>
<td>bank*&lt;br&gt; This will retrieve articles containing words derived from bank: bank, banks, banking, banker, etc.</td>
</tr>
<tr>
<td><strong>nearN</strong></td>
<td>Internet nearN Banking (where N is an integer)&lt;br&gt; This search will retrieve articles that contain Internet within N words (or less) of the keyword Banking.&lt;br&gt; Note: The N is optional; if omitted, the number 100 is assumed.</td>
</tr>
<tr>
<td><strong>&quot;...&quot;</strong></td>
<td>&quot;real estate&quot;&lt;br&gt; This search will retrieve articles that contain the exact phrase real estate.</td>
</tr>
<tr>
<td><strong>Parentheses ( )</strong></td>
<td>Use parentheses to separate search operators.&lt;br&gt; Take for instance, a search such as the following: (PE OR &quot;private equit*&quot; OR pes OR &quot;joint venture&quot;) and ITES&lt;br&gt; This search will retrieve articles containing any of the words (phrases) in within the parentheses, and the word ITES.&lt;br&gt; You cannot mix operators without parentheses. For example:&lt;br&gt; Incorrect - <strong>BPO and growth or employment</strong>&lt;br&gt; Correct - <strong>BPO and (growth or employment)</strong></td>
</tr>
</tbody>
</table>
The ISI Search Engine treats an ampersand (&) as a searchable character, and not as an operator.

To search for words containing &, like AT&T, key in the words without spaces surrounding the & for example AT&T, P&G etc. Or if the & is surrounded by spaces then the keyword should be enclosed in “ ” like “AT & T” , “P & G” or “M & M” etc.

If you search for AT & T (without enclosing in “ ”) the & will be stripped from the search string and the search will be performed on keywords : AT and T.

In short, ampersands are characters, not Boolean operators, and should not be used in place of AND as an operator.

To search for words containing a hyphen (-), like e-governance, key in the word without spaces surrounding the hyphen.

If you search for e- governance the - will be stripped from the search string and the search will be performed on keywords : e and governance.

The ? operator will substitute for any character.

Use ? to search for words which can be spelled in different ways.

For example : if you search for organi?ation, the search will retrieve results containing either organisation or organization.

These characters are unsupported and the search string will be stripped of these characters before performing the search.

---

### Examples of bad queries

<table>
<thead>
<tr>
<th>Inefficient queries</th>
<th>Recommended queries</th>
</tr>
</thead>
<tbody>
<tr>
<td>Morgan and Stanley</td>
<td>morgan stanley; &quot;morgan stanley&quot;</td>
</tr>
<tr>
<td>el and paso and energy</td>
<td>el paso energy ; &quot;el paso&quot; and energy</td>
</tr>
<tr>
<td>mergers and &amp; and acquisitions</td>
<td>merger* and acquisition*</td>
</tr>
<tr>
<td>Garments and industry or garments and sector</td>
<td>(garment* and industry) or (garment* and sector)</td>
</tr>
<tr>
<td>Deposits</td>
<td>deposit*</td>
</tr>
<tr>
<td>telecommunications OR telecom OR wireless OR GSM</td>
<td>telecom* or wireless or gsm</td>
</tr>
<tr>
<td>investments and in and infrastructure</td>
<td>investment* and infrastructure</td>
</tr>
</tbody>
</table>
